8/15/99

Lester Snow AUG 19 1999 0196

Executive Director, CALFED

1416 9th St, Sacto, CA 95814

Dear Mr. Snow,

I don't know a lot about water conservation and allotment, but I do know that in the race between water supply and population growth, growth cannot ultimately win.

The most important victory for me is to stop destroying habitat and wild waters, even if it's a question of letting the developers be dammed.

Counting on you to know when enough is enough,

Dave Blake
