Mr. Lester Snow,
Exec. Dir. Cal Fed
1416 Ninth Street
Sacramento, CA 95814

Dear Mr. Snow,

Re: Revised CALFED Plan

I strongly disagree with CALFED's pro-development strategy for California water management & restoration. As a registered voter and lifetime resident of this state I urge CALFED and my elected officials to seek a more conservation-oriented approach to restoring water quality in the Sacramento Delta & statewide.

Maintenance and protection of Fisheries, riparian habitat, and wetlands must be made a priority for any successful plan. Should CALFED chose to adopt a plan with revised actions focused solely on conservation and restoration of our limited water resources, you would then have my full support. I oppose the current plan.

Regards,

Susannah Waidtlow
