3/17/98

Dear Mr. Snow:

MAR 19 1998

My concern is over the conservation of water and keeping the quality at high standards. Californians were asked over 15 years ago to conserve water and many of us did that but I have heard very little from State offices since that time which emphasizes conservation and quality control.

As director of the Cal/Fed Bay and Delta Program I hope you will put renewed emphasis on both conservation and eliminating pollution of the Delta water by industry and agriculture

Best wishes in this tough job

Sincerely

Mary Rhyne

Lets keep it clean for birds, animals, fish + humans!
