Dear Mr. Snow

I am writing in response to CALFED's plan to increase ~~dam~~ water storage in dams & the building of new reservoirs. I am very opposed to these initiatives as they are environmentally detrimental to the wildlife and natural beauty of the river. There are many other alternatives for energy sources. Please reply to this letter as I would be interested to hear your response. The health of our environment is the most important issue of the future.

Thank-you,
Effie Lipner
