Lester Snow 8/15/99

Executive Director CALFED

1416 Ninth St.

Sacramento, CA 95814

Dear Mr. Snow:

I would like to express my opposition to any new water developments in the State of California. Currently, the state has more than enough water storage capability, and through proper conservation measures, this storage capability should supply enough water to users well into the future. Enough is enough. It is much more efficient to preserve existing resources than to correct past mistakes. As a professional, please don't ignore the past, but learn from it. As a public employee, you have the responsibility to fight for what the public

p2

majority wants, and overwhelmingly. The public has supported less / none public water projects. Listen to us!

Sincerely
