

Date: August 23, 1995

To: August 3 Workshop Participants

From: Lester A. Snow
Executive Director

Subject: Workshop Summary

Thank you for attending the first workshop of the CALFED Bay-Delta Program on August 3, 1995. Your participation in the workshop helped us to identify problems in the Bay-Delta system that will be the subject of our solution-finding process.

Enclosed is a summary of the workshop. We have attempted to organize the information gained at the workshop into problems, objectives, causes, and actions in each of the four resource areas. If you have any comments on the enclosed workshop summary, you can make them at our next workshop on September 14 or you can call Dick Daniel of CALFED Bay-Delta Program staff at the number on this letterhead.

We are now using information from a variety of sources, including the workshop, literature review, other processes such as the Estuary Project and the Bay-Delta Oversight Council, and staff expertise to develop summaries of problems in the Bay-Delta system. Around September 5, you will receive a packet of information related to our next workshop on September 14. Included in that packet will be a draft summary of all the problems that our program will address.

Thank you for your interest in our effort to solve problems in the Bay-Delta system. We look forward to seeing you at our next workshop.
