Dear Mr. Snow:

I am writing you to urge you to reconsider the revised CalFed Plan.

I oppose the CALFED Plan to increase water storage in the Central Valley by raising existing dam levels or building new reservoirs.

Instead I urge you to support a plan to increase conservation and efficient water use, as well as reclamation projects. Time to meter agricultural use! Grow less water-intensive crops!!

I support CALFED's proposed water restoration goals for the Central Valley, especially the removal of dams that will restore habitat for salmon and other anadromous species. It's time for us to stop

C-113429

C-113429

creating policy that only addresses the symptoms of our water crisis instead of really having some impact ~~on~~ BRINGING that reform + change.
If not, what can we tell our children about the choices we made when there was still a chance to do it right. I would like to hear your views on this.
Thank you.
