SEP 13 1999 840

Lester Snow
Executive Director, CALFED
1416 Ninth St.
Sacramento, CA 95814

Aug. 27, 1999

Dear Mr. Snow,

This letter is in response to the revised CALFED plan.

I would like to urge you to emphasize water conservation above all other options. It is foolhardy and premature to build more dams + diversions before we have even begun to see the potential that conservation + reclamation has to offer.

I strongly oppose CALFEDS existing

GP8 840(2)

plan to increase water storage in the Central Valley by raising dams + building new offstream storage reservoirs.

Thank you.

Susan Stephenson
