lester snow director of calfed -

Dear lester: Please consider this a responce to the calfed plan

~~I~~ oppose calfeds plan to increase surface water by raising existing dams or build offstream resiviors enough damage has been done allready - we need to save californias natural resources, not exploit them for the sake of large agribusiness. I support calfeds proposed restoration goals for central valley including removing some facilities such as englebright dam, that act as barriers to migrating salmon aggrieving important riparian habitats, and increasing instream flows for fish, wildlife and recreation. we however, cannot solve the ecological problems caused by dams and diversions by building more dams and diversersions;

Thank you for your time and 849(2)
Consideration I look forward
to hearing your position on this issue.
