Dear Mr. Snow:

Please consider this letter a response to the revised CALFED plan.

* I oppose CALFED's plan to increase surface water storage in the Central Valley by raising existing dams or building new offstream storage reservoirs.
* I urge CALFED to expand water efficiency, conservation, and reclamation programs to stretch our existing water supplies, instead of building new dams and canals.
* I support CALFED's proposed restoration goals for the central valley, including removing some facilities such as the Englebright dam, that act as barriers to migrating salmon, acquiring important riparian habitat, and increasing instream flows for fish, wildlife, and recreation.

More Dams and diversions are not the answer.

Sincerely, Rob Fisher

Dear Mr. Snow

I've been invited to a river rafting trip by "Friends of the River" and have learned about your intention about building more dams & increasing the storage capacity of existing ones. We strongly oppose building such dams for the sheer reason of bringing in some money to the area concerned.

Rei Miita 0261-2
