Dear Mr. Snow -

I am writing to urge you to reject all of the currently proposed Calfed alternatives. Please choose another alternative based on conservation and restoration in order to ensure high water quality for people, wildlife, farms, and businesses. The plan should protect watersheds, create programs for water conservation and efficiency, avoid damming and channeling, and ensure restoration of California's fish + bird populations and wetlands, rivers, deltas, + bays. Please enter my letter into the formal record for the draft EIR and EIS.

Thank you -

Sincerely,

John Scheve
