MAY 1 5 1998

Dear Lester Snow,

I'm writing you with regard to Calfed Bay/Delta issue. I truly believe that none of the current alternatives put enough emphasis on conservation and restoration. You should consider a "Smart Alternative"
It should include

1) restoring and protecting our watersheds for healthy, reliable water for people + critters
2) create conservation programs and economic incentives to use our water more efficiently
3) maximize water efficiency before considering costly new dams, reservoirs + canals
4) Please restore Californias fish, birds, wetlands, rivers, delta + bay before its lost forever.

Please enter this letter into the formal record for the Draft Environmental Impact Report and Statement.

This is important to the world, we are all interconnected - Please do the right thing

Sincerely

Rico Mastrodonato
