MAY 1 2 1998

Dear Mr. Snow,

I am writing to express my concerns regarding the Peripheral canal project now being re-considered. I feel that a project of this nature will have a severe negative impact on California's ecosystem. The diversion of natural water flow can only harm and deplete the watersheds they draw from. I believe a much more long-term solution based on conservation and restoration will better serve the needs of californians and not just Agro-business special interests.

Please have this letter entered into the formal record for the Draft EIR & EIS

Sincerely,
Phillip L. Milner
