00404 CALFED Bay-Delta Program

Dear Mr. Simon 5/16/98

MAY 28 1998

I urge you to oppose any program that requires adding new, or enlarging existing dams. The construction of new dams can in no way be expected to ~~stop~~ solve problems associated with too little water flowing into the Delta. It is crucial that we restore the Delta eco system. This requires more natural flowing water. Much more can be done for the long range welfare of California ~~industries~~ people by restoring our fishing industry.

The water needed by the farm industry and urban areas can be met by programs that encourage water conservation*. I urge you

to support these conservation programs.

This letter is being written in connection with the CALFED EIR. Please include my comments with the public record. Please provide me with a response and your position on these issues.

* at a fraction of the cost.
