Lester Snow
Cal Fed Bay Delta Program

Dear Sir,

I hope that you will support the ecologically responsible and fiscally palatable components of California's long term water supply and flood control. These include delta remediation by stream meander, riparian restoration, and flood plain management & water conservation. These do not include enlargement of any existing dams, construction of new dams, or any form of peripheral canal. Further logging in sensitive watersheds should also be prohibited. Thank you for considering these points.

Sincerely
Jonathan McClelland
