Mr. Steve Ritchie
Cal-Fed Bay Delta Program.

Dear Mr. Ritchie:

Californias farmland is its most valuable resource.

Cal-Fed in their plan has not given enough thought regarding land conversion. We must reduce the loss of farmland. Farmers can't provide habitat or feed people without a reliable and affordable source of water. Cal-Fed needs to develop adequate water storage.

Cal-Fed should hold public hearings before its plans are finalized. — and farmers need to be included!

Thank you for your serious consideration of this important matter.

Sincerely,

Mary Wigno
