Dear Executive Director Snow,

Please ensure that CalFed creates and implements a fourth alternative based on conservation and restoration to provide ample and high quality water for California's families, wildlife, farms and businesses into the 21st century.

This fourth alternative would: provide incentives to conserve and use water more efficiently; maximize water efficiency before even considering dams or canals; restore and protect our watershed and ground water basins; and restore California's wetlands, rivers, delta & bays.

Please enter these comments into the formal record for your Draft Programmatic Environmental Impact Report and Statement.
