CALFED Bay-Delta Program 00477

5-20-98

Dear Mr. Lester Snow

JUN 01 1998

I have a few comments in reference to the CALFED BAY-Delta Program:

1- I strongly encourage CALFED to expand Water Efficiency, conservation, and reclamation programs to stretch our existing water supplies, instead of building new dams and canals

2. I support CALFED'S proposed restoration objectives for Central Valley stream flows, water temperature, stream meander, flood plain management, and riparian/riverine habitat, as well as all sensitive, threatened, and endangered species. These restoration objectives are needed to mitigate the impacts of current water facilities.

3- I Oppose all CALFED alternatives that require construction of new or enlarged dams and canals, including the Peripheral Canal and an enlarged Shasta Dam.

CALFED Bay-Delta Program

4- I oppose CALFED's proposed restoration objectives for Upper watershed forest management and delta hydraulics. We cannot reduce the wildfire threat in the Upper watersheds by increasing logging and we cannot resolve the delta's flow problems by building more Dams and Diversions.

Please consider the long term goals of CALFED Bay-Delta Program. Somehow, we must seek a sustainable future for California!

Thankyou
