00480 JUN 03 1998

I live in the Pajaro Valley (Watsonville Ca, Santa Cruz County).
How long will it be before our farmland is permanently retired? Why? who will feed the human population that we now feed?
Water will be saved, but not food...
Has not anyone challenged the land retirement program.

Dear "Cal-Fed"
I just read your Permanent Land Retirement - Analysis Report. Jan 14, 1998 draft.
I read the first question relating to the impact of this action I have another question - how will the crops be replaced? The crops that will be taken out of production Another question -- how will people be fed?

C-011031

C-011031

What if a farmer doesn't want to retire land? How will ~~they~~ he be coerced to do so? Will there be ~~penalties~~ penalties if farmer do not want to retire farm land?

I request answers to these questions. Jeanette Crosetti
