Future water supplies California

Lester Snow
Executive Director Calfed.
1416 Ninth Street Suite 1155
Sacramento Ca 95814

Dear Mr Lester Snow

In order to satisfy the needs of agriculture, industry, the increasing human population and wildlife I urge that Calfed provides a plan based on conservation, not on the immense costs of dam building, many of which have proved to be engineering mistakes in the past.

The allowance made by Calfed of 1% ~~conserving~~ conservation of water by those engaged in agriculture seems pessimistic when some farmers have conserved up to 50%. Maximum water efficiency, the protection of watersheds and the restoration of wetlands should be, I submit, carried out before constructing dams and canals.

Thank you for your consideration.

Sincerely

Paul Moore
