JUN 12 1998

Dear Mr. Breitenbach

I am concerned about the new dams, resevoirs and canals that are proposed to be built. I think our first concern should be about conserving water. More time & money needs to be spent on teaching & informing people about water conservation before we go an alter natural rivers, lakes, wetlands & entire watersheds. I do not want to see more dams, canals & other water diversions built but I would like to see more water conservation awareness.

Thank you

Jason Cropley
