Dear Mr. Snow:

I am writing this letter today against the Calfed Bay Delta Program & its proposed (peripheral canal) for the San Joaquin County area.

We need to protect our delta farmlands, please remove it from plans to destroy it.

We need increased releases into the San Joaquin River from Friant Dam.

We need increased planning & funding of municipal water treatment facilities.

Please revise the "Draft Plan" & choose a preferred alternative which would move California toward the ability to store & manage water more effectively.

Sincerely yours,

John Petrik
