Dear Executive Director Snow:

I urge you to ensure that CalFed puts forth & selects a new "Smart Alternative" based on conservation & restoration to provide reliable, high-quality water for California's people & wildlife.

This program would do the following:

1. Ensure strong conservation programs & economic incentives to use our water more efficiently
2. Maximize water efficiency before even considering new infrastructure projects.
3. Restore & protect our watersheds & groundwater basins
4. Restore California's fish, birds, wet lands, rivers, delta & bays.

Please enter these comments into the formal record

for your Draft Programmatic Environmental Impact Report & Statement
Thanks very much.

Sincerely,

Larry Krieger
