Dear Mr. Breitenback:

RE: Comments on the draft programmatic EIS/EIR

I'm writing again due to additional prompting of a farming family's member. Also on behalf of my family, who have roots in the Delta.

The point about land must be taken out of production to make way for new water facilities is known through out the agricultural community. The Delta should not bear the burden for the entire state. Please find an alternative to flooding the Delta islands. An alternative must also be found for the peripheral canal-type of water transfer system *(which I voted against in the past) in order to maintain water quality of San Joaquin County and the delta system. Thank you.

Sincerely,

Mary Jeanette Arriaga

(a native of California and member of San Joaquin California Women for Agriculture)

* To clear a point: I voted No on the Peripheral Canal
