Lester Snow
Executive Director, CALFED
1416 Ninth St
Sacramento CA 95814

Dear Mr. Snow:

I am very concerned about the "revised CALFED plan."

I oppose CALFED's plan to increase surface water storage in the Central Valley by raising existing dams and building new storage reservoirs, including raising Shasta dam.

I encourage CALFED to consider more long-term solutions that preserve California's beautiful

rivers.

We cannot solve our ecological problems by building more dams. There are wiser alternatives!

Thank you for your time!

Sincerely,

Tamar I Davis
