

APPENDIX B DETAILED DESCRIPTIONS OF ALTERNATIVES

Appendix B contains detailed listings of activities or actions for each of the 10 draft alternatives. General descriptions of potential benefits for each activity are also shown.

The activities are listed under three major headings: 1) Physical and Structural Features; 2) Operational and Management Features; and 3) Institutional and Policy Features. Subheadings for each provide additional groupings of actions such as Habitat Restoration, Fish Protection and Transport, Water Transport, etc.

The listings in Appendix B show approximate sizes for many features of each alternative. The sizes are used only to illustrate the general concept for the draft alternative and *should not* be viewed as absolute numbers. Many of the features are described with numerical ranges that also should not be considered absolute. For instance, showing a north of Delta storage at 0.5 to 1.0 MAF does not limit the final size to that range. After analysis in Phase II of the Program, this same storage could just as easily be 200 TAF or 3 MAF.
