AUG 1 9 1999

Dear Mr Snow,

I do not agree with Calfed's plan to increase surface water storage in the central valley by raising dams or building new storage reservoirs.

I recommend that Calfed expand water efficiency conservation and reclamation programs to stretch our existing water supplies, instead of building new dams, we should switch to higher value and less water consumptive crops by installing water meters for agricultural and urban users. I support Calfed's proposed restoration goals for the central valley, including removing facilities such as the Englebright

dam, and increasing instream flows for fish, wildlife and recreation.

Thank you for your time

Sincerely,

Abe Harrington
