Dear Mr Snow:

I wish to recommend certain changes be made to the current "revised Cal-Fed plan. Rather than increasing the size of various dams which have already been built, I urge Cal Fed to adopt aggressive approaches to promote conservation of California's water resources.

Similarly, rather than constructing or expanding off-stream reservoirs I would like to recommend that at least equivalent resources of our governmental agencies be used to

~~[illegible]~~ ~~[illegible]~~ encourage the most wasteful industrial and agricultural users ~~of~~ of water obtained by damming the rivers of California

Thank you for your consideration

Sincerely,

Walter R Merry, Jr
