08/07/99

Dear Mr. Snow:

I am writing today to voice my opposition to the revised CALFED's plan to increase surface water storage in the Central Valley. Raising existing dams or building offstream reservoirs would flood segments of the Sacramento and McCloud rivers as well as require massive water diversions of these.

Instead, I believe the expansion of water efficiency, conservation and reclamation programs a much more plausible, economic and ideal solution to stretch out existing water supplies.

I do support CALFED's proposed restoration goals for the Central Valley, including removing some such as the Engelbright dam.

Trusting that our peoples' voices and concerns are heard,

Sincerely

Andrew Cocker
