

DRAFT 10/18/95

AGENDA
PUBLIC MEETING - 9/26/95
BIG PAGE NOTES

Add objective

- 1) Water reliab. for areas & watersheds of origin.

Only surplus waters will be exported

- 1) Projects mitigate imports.
- 2) Provide salinity control.
- 3) Integration of releases from storage.
- 4) Provide water to watersheds to the areas of origin. (Pay for stored water)

Action

Bypass from San Joaquin River to SWP/CVP canals (San Joaquin River Mgmt. Plan)

Diagram:

Zach

Water quality

- WQ Data (Extensive)
 - Goes to SWRCB - EPA
 - Data Base to assess serious number of problems
 - (Validate data - older data system)

Realtime model needed

Existing models differ in methodology & area

Standards violated - Credibility Issue

"Grasslands" Type problem

a:\office\public\bignotes.wpd

PUBLIC COMMENTS

- 1) S.J. Co's issues must be addressed saline intrusion...
- 2) Agreement of "only SURPLUS water exported" has been broken. This program needs SWRCB involvement as adjudicator must be unbiased : No business being part of agreement.
- 3) Over drafted G.W. Basin in Eastern S.J. Co. Problem
- 4) Clean up San Joaquin River - Export sails to the Bay or Ocean
- 5) Build an operable barrier at the head of Old River

Emphasize resources behind levees

Standards for toxic materials leaching from dredging are too restrictive

Credibility Problem

- Gov., has not kept promises , need to be represented equally.
- Need to achieve equity prior to "buying into" program.

Minimize Flooding

- Risk to South Sac City (Lack of Conveyance)
- Conflicts with previous program / activity schedules (INDP)
- Potential to collaborative with other programs

Transfer of problems
