Calfed Bay-Delta Program
1416 Ninth St. Room 1155
Sacramento, CA 95814
State Clearinghouse Number 96032083

To Whom it May concern,

In order to restore the habitat and environment more fresh water needs to flow through the Bay. More aggressive water conservation practices need to be established before Calfed decides to expand reservoirs and build more dams. These acts will cost taxpayers more money and continue to degrade the Bay-Delta ecosystem.

Because agriculture uses over 80% of the state's water supply, a small reduction in the amount of water lost due to evaporation, which can occur by switching to more efficient technology, significant water savings can also occur.
Please invest in more water efficiency before building more dams and expanding reservoirs.
