you must guarantee more fresh water flows through the Delta to improve water quality for people and wildlife. Our wetlands are vastly depleted.

The best way to store our water is in the aquifers, not dams and canals. We also need to investigate carefully the impact of genetic engineered seeds being used near the Bay-Delta

Thanks for

Dear Cal-Fed

The original arrangement of Cal-Fed was to allow an adequate amount of water to restore river habitat salmon runs etc. It is hoped the arrangement of this a greement are followed. We dont need all our water for agriculture raise many crops already in surplus. Thank you

Sincerely Alan George
