Lester Snow
Executive Director CALFED

Dear Mr. Snow,

As property owners and peach farmers along the Sacramento River, we write to voice our objections to the revised CALFED plan. We are strongly opposed to the proposal to raise existing dams or building new off-stream storage reservoirs - we object to diversion of water from the Sacramento River & fear the flooding which would result.

Please expand water efficiency, conservation and reclamation programs - we support CALFEDS restoration goals

for the Central Valley
More dams and
diversions are not the
solution.

Sincerely
Warren and
Jutchen Smith
