Hello - I write in concern 738
for the current draft plan
for SF Bay & Sacramento
Delta. We need to implement
environmentally & economically
sound solutions, including
conservation, pollution prevention
& better management of
groundwater & watersheds.
Please do not build any
new dams, reservoirs or
canals during Stage 1.
Instead fund projects to =
1. improve water quality by
preventing pollution
2. groundwater storage &
management
3. restoring the rivers, bays &
wildlife habitats
4. guaranteeing increased
fresh water flows -
Lets Restore our Bay & delta
