Dear Mr. Snow,

I have been a California resident for 25 years and have enjoyed its natural beauty especially the rivers. I oppose CALFED's plan to increase surface water storage in the Central Valley by building dams and new offstream storage reservoirs. Let's work to increase water efficiency, conservation, and reclamation programs instead of building new dams and canals.

Let's spend less money and create less ecological problems by exploring ways to value the water we have.

Sincerely,

Mari Alison Whittaker
