Lester Snow
Executive Director, CALFED
1416 Ninth St.
Sacramento, CA 95814

Dear Mr. Snow,

I am writing because I am concerned about the revised CALFED plan. The original purpose was to preserve our natural resources. Raising existing dams & building new upstream storage reservoirs may not be in the best interest of salmon, water, etc.

I would hope that water efficiency, conservation & reclamation programs would be used instead. This could be done by switching to higher value & less water consumptive crops & by installing water meters on all agricultural & urban uses.

- Please respond and let me know what you think.
- Logically more dams & diversions will not solve problems caused by dams & diversions.

Thank you,
Jessica Boell
