Lester Snow
Executive Director, CALFED
1416 Ninth St
Sacramento, CA 95814

Dear Mr. Snow,

I'm writing this as feedback on the CALFED plan. I value California's rivers and oppose plans to expand the dam system. There is much we can first accomplish more economically and with less environmental disruption, by means of conservation and better management of consumption of current water supplies.

I support CALFED's proposed restoration goals that benefit wildlife in California, such as removing facilities like the Englebright dam.

I oppose CALFED's proposals to increase surface water storage in the Central Valley.

Sincerely,
Richard Whittaker
