Lester Snow
Executive Director, CALFED
1416 Ninth Street
Sacramento, CA. 95814

Dear Mr. Snow,

Please consider this letter in view of the Calfed plan revision.

I believe we need to stretch our existing water supplies and not build new dams. We need to look at expanding water efficiency, conservatio and other reclamation programs. Water is for all to use not just those in an agricultural or urban setting.

I applaud CalFed's hopeful

restorations in the Central Valley to remove impediments to fish and wildlife.

In the search for balance in life, the hope is to work with what currently exists : ie: dams) instead of building more dams.

Sincerely
Lana Leyle
