Exective Director Snow

Please enter these comments into the formal record for the Draft Programmatic Environmental Impact Report and Statement. The CALFED Bay/Delta program must be revised to:

- not commit to building any new or expanded dams, reservoirs, or canals during CALFED's Stage 1;
- increase investments in water conservation and efficiency, ground water management, and drinking water treatment;
- improve water quality for people and wildlife by preventing pollution at the source;
- restore rivers, bays, and fisheries by providing firm guarantees of more fresh water flows and by preserving the land around rivers; and
- not make taxpayers subsidize new or expanded dams, reservoirs, or canals

Thank you
