CALFED Bay-Delta Program

aug. 9 2000

Mr. Steve Ritchie
Cal Fed Bay Delta programs

we must stop importing food from other countrys that have no requirments for food quality and low labor costs that californians cant compete with

I think calafornia needs to store the winter rain water that rushes to the ~~ochen~~ OCEAN and does nobody good. It should be stored and used in the summer when it would produce food.
