FROM Chris

PHONE NUMBER

SUBJECT: CALFED

Calfed stuff I mentioned to you. The first is a compilation of references they used to prepare the action items. Several of the actions involve Se, salt & pesticides but no R.B. references on the first two. Is there any key documents, ours or others, we might want to mention? Second, copy of proposed ranges. Did I get your comments right? Third, draft of their proposed actions. They wanted comments by the 27th but I called and said we could not send before 3 Dec. If you have comments please skip to me, I will collate with mine and Jerry and send out. Thanks much Chris
