Week 38

Are there ID specific ops criteria added to base? ~~Too~~
How could they be subject to flex ops?

Bruce - "EI not working"
- what do we want to flex around? - "Matrix"

Thorbault - 5 improvements for ops
1. S.J. River - too short - should be Mar-June flow/export
- export reduction 3/15 - 6/15
- Salmon monitoring to "trigger"
- reverse trigger - 10 days w/out finding salmon
2. Fall E/I ratios
- spring run should have equiv. prot. as WRC salmon
Jim - many S-RCS would benefit partially from wrs actions
Bruce - de-emphasis of Flows below Hood, Jim White - considered flow patterns
3. .25 EI could be adjusted - at low inflow, lower EI
higher inflow, higher EI
- export rates follow season + hydrology
4. 75% inflow for 2 months is a huge water take
Pete C. - water supply system dependent on inflow in critical years
- problem
- most of 75% years in Aug/Sep is from storage release, not natural hydrology
5. Min. outflow or inflow when X2 isn't governing factor
Bruce - could you "float" 60 days over the VAMP period, use flex concept? yep - and of may want protections for smelt.
flex of protection inv. correlated with rigor of monitoring
S.J. salmon monitor
- trigger - 60 days Rx, continue monitoring
yoy Delta smelt - trigger combo of distribution, so. Δ/chipps cont Δ/chipps
relative to inflow, outflow, X2, SJ flow
Rx - 28 days, varying with month + flow
or more size of 20-30 mm
Adults - trigger on distribution - relative any year previously in Δ
- Sep. Midwater Trawl Index
Stripers - trigger: distribution, outflow
→ Delta vs. Suisun Index as trigger
Rx ↑ outflow or ↓ exports

go to Sep 27

~~spring run~~ →

X2 / 1962 LOD - the more we protect a single species, makes Bruce nervous about ecosystem ^gaming

spring run yearlings → Guzman, DCC or somewhere
~~triggers~~ - coded wire tag fish (late fall as surrogates)
- spring-run monitoring plan
Rx - DCC closure at first sign of spr-run leaving tribs
- exports ~~[illegible]~~ reduction (21 days unless flows very low)

S.J. fry show in Feb
Triggers - high flows, monitor effectiveness?
screwtraps at Mossdale

- tuesday vs. thursday
