Rick,

Based on the Discussion Paper - I feel that the evaluation that we are doing for the Tracy Fish Collection Facility (TFCF) should be added to the Appendix A. The time frame that we are looking at to complete the evaluation and based on the best alternative complete the modifications or replacement is 5 to 10 years. The TFCF could be added on A-4 under Physical Actions - since the existing facility could be modified or replaced. Or, on A-5 under Environmental Actions - where the modifications or the replacement would benefit the fish. Or, placed under both Actions.

Bob
