June 15, 1999

Dear Governor Davis,

Please help protect our rivers, bays, and water by ratifying the CALFED Bay/Delta program.

I'm interested in preserving the environment. All development should be disallowed if it has detrimental effects on our environment. The CALFED program invests in water efficiency for at least seven years before even considering new dams or reservoirs. It restores our rivers, bays, and the land around them. It improves water quality for people and wildlife by enforcing pollution limits. It stops making taxpayers pick up the tab for studies of new dams and reservoirs that flood valuable habitat and remove needed water from our rivers.

We in Southern California have a smog problem again, since the AQMD has relaxed again on polluting businesses. It [illegible]
