Dear Governor Davis, 6-15-99

Please ensure the Calfed program. We need to keep our rivers healthy.

I don't see how it makes sense to spend taxpayer money on new dam and reservoir projects that primarily benefit developers and agribusiness while harming wildlife, our natural water resources, and discouraging efficient conservation of the water resources we already have.

Please support Calfed Bay/Delta program so future generations can experience better water quality and guaranteed natural beauty and wildlife.
