6/21/99

Dear Governor Davis;

Water is precious! That's why I'm interested in any plan that will invest in water efficiency, restore our rivers, bays and fisheries, and improve water quality.

I believe the "CALFED Bay Delta" program can do this. It will also save us taxpayers money by avoiding the need for new studies of new dams and reservoirs.

I urge you to adopt the CALFED program and protect California's water resources for many years to come.
