Dear Governor Davis,

I am deeply concerned that our state's water policy reflects a deep concern for conserving and wisely utilizing this precious resource. Past policies have not sufficiently been concerned with conservation. As decisions are now being made for the future, I would ask you to support the Calfed Bay/Delta program. This plan best combines efficiency, water quality, and restoring our rivers and bays and surrounding land.

I am absolutely opposed to new dams and reservoirs. Let's use what we have in a more rational and efficient manner.

Sincerely,
Richard O. Schroeder
