~~T. Hannigan~~

Dear Mr. Davis,

Please do everything you can to protect and safely use California water resources. It is very important to our future - as a state and as individuals.

The "CALFED" Bay/Delta" program can help us to improve our water quality; protect fisheries & watersheds; and invests in water conservation for healter rivers, abundant wildlife and clean water for everyone.

PLEASE ensure the CALFED program -

1. Invests in water efficiency for 7 years before even thinking of new dams.
2. Restores our bays, fisheries and rivers with adequate fresh water & cares for the land around our rivers.
3. Sets pollution limits to improve water quality for wildlife & people.
4. And stop wasting money on new dams.

Please be a governor for the people, not big business. Thank you so much
