6/11/99

Dear Mr. Hannigan—

I write about the CALFED program and urge you to consider the long term regarding California's water resources.

Please:

- Invest in water efficiency rather than in new dams and reservoirs
- Provide for the health of rivers and watersheds by ensuring adequate fresh water and riparian habitat. Ecosystem health is the basis for human heath.
- Enforce pollution standards.
- Start thinking sustainably— and enact regulations to move us to a positive future.

Thank you.

Sincerely—

Ann Hancock
