20 June, 1999
T. Hannigan

Dear Mr. Hannigan,

I am writing to urge you to please stand firm against developers, agribusiness & other special interests to do what is good for both California and our planet.

The CALFED Bay/Delta program should ensure the restoration and preservation of our invaluable rivers, bays and fisheries. We must safeguard these treasures from pollution and refrain from wasting taxpayers money on more studies of what we already know to be detrimental to our environment --- new dams, reservoirs, etc. Rivers are more valuable to us all when they do what they were meant to do!

Future generations will be grateful for your wisdom & farsightedness.

Sincerely,

Rebecca Ticoria
